

<NSObjectNSObject>

```
classDiagram
    class NSObject {
    }
    class FBNativeAdDelegate {
        + nativeAdDidLoad()
        + nativeAdWillLogImpression()
        + nativeAd:didFailWithError()
        + nativeAdDidClick()
        + nativeAdDidFinishHandlingClick()
    }
    NSObject <|-- FBNativeAdDelegate
```

The diagram shows a class hierarchy. At the top is a class box for NSObject, with the name <NSObjectNSObject> in its top compartment. Below it is a class box for FBNativeAdDelegate, which is shaded gray. The FBNativeAdDelegate box has three compartments: the top one contains the name <FBNativeAdDelegate>, the middle one is empty, and the bottom one contains a list of five methods, each preceded by a plus sign. A blue line with an open triangle arrowhead points from the top of the FBNativeAdDelegate box to the bottom of the NSObject box, indicating inheritance.
