

NSObject

```
classDiagram
    class NSObject
    class FBAdSettings {
        +addTestDevice:
        +addTestDevices:
        +clearTestDevices
        +setIsChildDirected:
        +setUrlPrefix:
        +getLogLevel
        +setLogLevel:
    }
    NSObject <|-- FBAdSettings
```

The diagram shows a class hierarchy. At the top is a box for 'NSObject' with two empty compartments below the name. Below it is a box for 'FBAdSettings' with a header compartment and a large compartment for methods. A blue arrow with an open triangle head points from the 'FBAdSettings' box up to the 'NSObject' box, indicating inheritance.

FBAdSettings

- + addTestDevice:
- + addTestDevices:
- + clearTestDevices
- + setIsChildDirected:
- + setUrlPrefix:
- + getLogLevel
- + setLogLevel:
